

Anton Vusatyi

Senior Software Engineer

Istanbul, Turkey | anton@vusatui.com | 0507 445 38 09 | linkedin.com/in/vusatui
github.com/vusatui

Summary

Senior Software Engineer with 9+ years of experience building **scalable, fault-tolerant distributed systems** and backend services on **Node.js / TypeScript**, with working proficiency in Java, Go and Python.

Strong focus on **architecture, reliability, and performance** — systems handling $\sim 200 \text{ RPS}$ with $\text{P95} \leq 500 \text{ ms}$, **zero-downtime deployments**, and mature **CI/CD** practices.

Experienced in event-driven/microservice architectures, system design, observability, and **IaC** led cross-functional teams and mentored 20+ engineers.

Introduced **AI** into development and management processes, improving productivity several times.

Skills

Programming: **TypeScript**, JavaScript (Advanced); **Java, Python, Go** (Working proficiency); **SQL**

Backend: **Node.js** (NestJS, Express), Java (Spring Boot), GraphQL, REST, RPC, WebSockets

Data & Storage: Relational and NoSQL datastores (*PostgreSQL, Redis, MongoDB* etc.)

Cloud & DevOps: **AWS**, Azure, Docker, **IaC**, **CI/CD** (GitHub Actions, Jenkins)

Architecture & Practices: **Distributed Systems, Scalability, Fault Tolerance**, Event-Driven Architecture, Message Queues & Stream Processing, **Observability**, System Design

Experience

Software Engineer → Lead Software Engineer, EPAM Systems – Istanbul, Turkey Sept 2021 – present

Led modernization of an enterprise platform; owned architecture, reliability, and delivery at scale.

- Designed and operated backend services handling $\sim 200 \text{ RPS}$ with $\text{P95} \leq 500 \text{ ms}$ and **zero-downtime** releases.
- Built **event-driven** cloud-native components using **AWS SQS** and **Lambda** for async communication between microservices.
- Developed data-processing pipelines on **Azure Durable Functions** (Excel ingestion → validation → reporting) with idempotent steps and retries.
- Integrated microservices via **Azure Event Hub** to enable data platform streaming and ingestion.
- Optimized **CI/CD** pipelines ($60 \rightarrow 15 \text{ min}$) and reduced MTTR via automation and observability improvements.
- Mentored 20+ engineers and facilitated architecture review sessions across teams.

Software Engineer, MEDIA5 – Moscow, Russia Apr 2021 – Sept 2021

Built platform for automated promo-site deployment; focused on developer experience and runtime efficiency.

- Designed reusable delivery system → *reduced infrastructure costs $\sim 3\times$ and development time $\sim 10\times$.*
- Delivered ‘**Node.js**’ services and ‘**CI/CD**’ integrations for templated provisioning.

Software Engineer, Piramis – Novorossiysk, Russia July 2019 – Apr 2021

Led development of a scalable web platform; introduced monitoring and modular architecture.

- Scaled application to **40K DAU**.
- Delivered features driving $\sim 17\times$ **monthly revenue growth** over 2 years.
- Built internal package library → halved feature delivery time.

Software Engineer, SITEMADEPRO – Novorossiysk, Russia Mar 2017 – July 2019

Delivered commercial web projects and improved team efficiency through internal frameworks.

- Delivered 13+ projects end-to-end; introduced shared framework → delivery speed $\times 3$.
- Strengthened CI and testing for higher release stability.

Projects

Shestakov Yacht Sales — Platform Revamp

Cloud / backend modernization for a global yacht marketplace.

- Re-architected backend infra (**Next.js + Node.js + NestJS + NATS + IaC**) with defined SLOs and monitoring.
- Implemented **PostgreSQL-based queue** for batched and parallel updates to optimize write throughput.
- Improved deployment and page performance; enhanced user experience ×2.

Bizii — AI-Assisted Trademark Platform

Designed backend architecture and CI/CD for an **AI-driven B2B platform**.

- Built '*TypeScript*' backend on '*Supabase*' / '*Vercel*'; implemented '*RAG-style pipelines*' for automation.

Publications

Architectural Approaches to Building Highly Available Distributed Systems

May 2025

7universum.com/ru/tech/archive/item/20317 (Research note)

Research & Writing

Message Broker Workshop

Hands-on research of broker semantics for write-heavy systems; formalized in GitHub with documentation.

Ongoing.

- Exploring trade-offs between at-most-once, at-least-once, and exactly-once processing.
- Practical experiments with RabbitMQ Streams, Kafka Streams, and AMQP batching; benchmarks and analysis in progress.

Education

Moscow Humanitarian University, in General – Moscow, Russia

Sept 2015 – Aug 2019

Certificates

- AWS Developer Associate
- PMI Certified (Project Management)

Volunteering

Technical Interviewer / Mentor, EPAM Systems

Jan 2023 – present

Conduct technical interviews, mentor engineers, and support career growth programs.
